PROFESSIONAL SUMMARY

Full stack developer with 4 years of experience building and shipping scalable, multi-tenant SaaS platforms for healthcare and proptech using React, TypeScript, JavaScript, Python (FastAPI), and Microsoft Azure. Core engineer on a healthcare integration platform (HL7 v2, FHIR, X12 EDI), building Generative AI features with LLMs and LangGraph agents. Owns features end to end in cross-functional Agile teams, from Figma designs and REST APIs to Kubernetes, Infrastructure as Code (IaC), and CI/CD.

PROFESSIONAL EXPERIENCE

Software Engineer | Keleno Labs, Kochi, India

April 2022 – Sep 2026

MedSyncAI: no-code healthcare integration platform (multi-tenant Azure SaaS)

- Engineered core services for a platform that lets healthcare teams build, deploy, and monitor HL7 v2, FHIR, X12 EDI, and document pipelines without code (React, Python/FastAPI microservices, NiFi, PostgreSQL, Kafka) serving around 10 tenants.
- Built a Generative AI agent pipeline (LangGraph, LLMs) that turns chat conversations into validated, deployable NiFi flows; added deterministic HL7/X12 generators that cut LLM cost per interface to zero and build time by 90%.
- Implemented an HL7 v2 MLLP adapter, HL7 version transformation engine, FHIR R4 conversion, X12 EDI over SFTP/PGP, and OCR + LLM document processing with dead letter routing and payload retention controls.
- Authored Azure Bicep Infrastructure as Code (App Service, PostgreSQL, Key Vault, VNet, Redis, Event Hubs), Kubernetes/Helm charts, and an Azure Marketplace template for hosted and bring your own cloud (BYOC) deployments.
- Integrated Keycloak OIDC single sign-on (SSO) across the platform and NiFi with a realm per tenant and role-based access control (RBAC); secured secrets with Azure Key Vault; hardened tenant isolation against the OWASP Top 10.
- Delivered tenant admin features (interface lifecycle, deployment status monitoring, usage metering, entitlements, audit logs) and API Studio, which publishes tenant data APIs through Azure API Management.

Other products and engineering practices

- Built an AI-driven dynamic pricing and revenue management platform for property managers (React, TypeScript, Python, PostgreSQL), improving projected occupancy/revenue by 30% across 1,000 properties.
- Engineered a multi-tenant healthcare platform on Azure FHIR, Logic Apps, and API Management (scheduling, grievances, behaviour tracking, staff planning), plus a Java Spring Boot analytics tool that cut manual reporting by 20 hours/week.
- Contributed 100+ accessible React components to the company design system and ran Azure DevOps CI/CD pipelines with release gates and zero-downtime deployments; automated client reporting with KNIME and Power BI.

Software Engineering Intern | NuVeda Learning, Bangalore

Sept 2021 – Oct 2021

- Added multilingual (i18n) support to a learning management system (LMS), enabling rollout to non-English markets.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3, Groovy

Frontend: React, Redux, TanStack Query, Vue.js, Tailwind CSS, Material UI (MUI), Jest, WebSockets, Figma

Backend: FastAPI, Django REST, Flask, Node.js, Spring Boot, REST APIs, Kafka, Microservices, Event-Driven Architecture

Healthcare & Integration: HL7 v2, MLLP, FHIR R4, X12 EDI, Apache NiFi (DSL, NiFi Registry), SFTP/PGP, OCR

AI & Automation: Generative AI, Large Language Models (LLMs), Prompt Engineering, LangGraph, AI Agents, Retrieval Augmented Generation (RAG), Vector Search (Pinecone), n8n, KNIME, Power BI

Cloud & DevOps: Microsoft Azure (App Service, Container Apps, Azure FHIR, Logic Apps, Key Vault, API Management, Blob Storage, Event Hubs), Azure Bicep, Infrastructure as Code (IaC), Docker, Kubernetes, Helm, Azure DevOps, CI/CD, AWS, Linux

Security: Keycloak, OIDC, SSO, OAuth 2.0, JWT, RBAC, Azure AD (Microsoft Entra ID), Managed Identity, OWASP Top 10

Databases & Tools: PostgreSQL, Microsoft SQL Server, MongoDB, Redis, Git, GitHub, GitLab, Bitbucket, Azure Repos, Jira, Agile

EDUCATION

Master of Computer Applications (MCA) | AIMS Peenya, Bangalore University | 2019 – 2021 | GPA: 8.5/10

Bachelor of Computer Applications (BCA) | Krupanidhi Institutes, Bangalore University | 2016 – 2019 | GPA: 8.0/10
